PROFESSIONAL SUMMARY

Full stack engineer with four years of experience shipping production web applications end to end, from frontend design and REST API architecture to database schema and deployment. Built real-time SaaS dashboards, live chat platforms, and headless CMS-driven marketing sites using React, Next.js, Node.js, and JavaScript, with hands-on ownership of authentication, real-time data streaming (WebSockets, Redis Pub/Sub), and third-party API integrations. Comfortable taking end-to-end ownership of features within small, cross-functional teams, from wireframe to production release. Available to join immediately.

WORK EXPERIENCE

Full Stack Engineer

Jun 2026 - Present

Vurks | Karachi, Pakistan (On-site)

- Built the complete React Native mobile app for a B2C services marketplace in the UAE, covering lead submission, OTP verification and a provider-facing dashboard, now live on the Google Play Store.
- Integrated REST APIs built in Laravel into the mobile app, handling authentication flows and Stripe payment screens.
- Built responsive frontend screens in React Native with clean component architecture and proper state management.

Full Stack Engineer

Aug 2024 - Sep 2025

ChatKnot | Karachi, Pakistan (On-site)

- Built the complete frontend of chatknot.com using Next.js, TypeScript, Redux Toolkit, and Tailwind CSS, including a real-time visitor dashboard, live chat interface, conversation history, lead analytics, and a role-based admin system.
- Built the Node.js and Express backend with JWT authentication, refresh token rotation, multi-tenant middleware, and REST APIs consumed by the frontend.
- Built the AI chat widget in JavaScript, handling WebSocket connections, typing indicators, message queuing, and live metadata updates as visitors navigated the site.
- Used Socket.io and Redis Pub/Sub for real-time event streaming covering live visitor presence and agent notifications.
- Developed a reusable React component architecture used across the entire platform to keep the UI consistent and easy to maintain.

Freelance Full Stack Developer

Apr 2021 - Jun 2024

Independent (Fiverr and direct clients) | Remote

- Built dynamic, responsive ReactJS frontends for clients in e-commerce, education, and professional services.
- Converted Figma designs into pixel-perfect, cross-browser web pages using HTML, CSS, and JavaScript.
- Built a headless WordPress site with Next.js and GraphQL, including multi-language support and static site generation, for a Cambridge-based client.
- Developed RESTful Node.js backends and integrated third-party APIs including payment gateways, maps, and social platforms.
- Delivered landing pages, dashboard templates, and small business websites for clients in the UK, USA, and Pakistan.

PROJECTS

- **ChatKnot:** Live chat SaaS platform with real-time visitor tracking, brand management, lead analytics, and role-based admin. Built with Next.js, Node.js, PostgreSQL, Socket.io, and Redis. chatknot.com
- **Cambridge Research Park:** Corporate website for a UK-based innovation campus. Converted the Figma design pixel-perfectly into Next.js and integrated a headless WordPress backend using ACF and GraphQL. cambridgeresearchpark.co.uk
- **1540 Broadway:** Marketing website for a 900,000 sq ft office campus in Midtown Manhattan, New York, built in Next.js with a headless WordPress backend using ACF and GraphQL. thenew1540broadway.com

- **Invoice Chaser:** Web app that automates invoice follow-ups for freelancers and small businesses with scheduled email reminders. Built with Next.js, Express.js, and Supabase.
- **Promzy (Android):** React Native app for discovering and managing AI prompts, integrating OpenAI and Google Gemini APIs. Live on Google Play Store. play.google.com/store/apps/details?id=com.promzy.app
- **Vurks App (Android):** B2C services marketplace mobile app in React Native covering the full booking and provider flow. Live on Google Play Store. play.google.com/store/apps/details?id=com.vurks.app
